BIOGRAPHY

Sad sack and tiller of doom, t.k. bollinger has been writing and recording songs since the grunge plague of 1991. He cut his teeth playing drums for one of the best bands you've probably never heard of, **The Stinking Badger of Java**.

While briefly defecting to electronica at the end of the millennium, he saw the error of his ways driving through the deserts of Australia in 2004. Collecting songs and impressions on his way to the top-end caused him to strip back his material and to begin playing an idiosyncratic style of country blues.

Not content to leave things there, and to cries of Judas, he went electric again in 2011, and began jamming with old friends Vis Ortis and R.S. Amor. The ensuing musical apoplexy coalesced into the doom-blues outfit **t.k.**

bollinger and that sinking feeling. They completed their first album, **A Catalogue of Woe**, in August 2014. Upon its release, the rest of his band was so appalled that they moved to Tasmania.

While patching things up, via Ouija board, Bollinger took it upon himself to complete his next album all alone. What emerged was his bumper opus **Shy Ghosts**, a collection of slow, delicately arranged songs that speak of sorrow and loss, dementia and decay, fog and fear. Oh happy day!
